# Retractable Banner Stands

Retractable banner stands are ideal for trade shows, exhibitions and corporate events because they are easy to travel with and offer a high degree of graphic protection. These banner stands can be used individually as stand-alone displays or en-masse to create an impressionable wall of graphics.

High quality banner stand hardware not only looks attractive and is durable, but it will treat the graphic better than low quality banner stands, which tend to leave impressions in the graphic and “chew” the graphic’s edges. At imageXPress, we do not promote products that treat graphics poorly.

Retractable banner stand graphics have subtle qualitative differences. High quality graphics (1) are produced using high resolution printing technology so that your graphic accurately represents your image and (2) are curl resistant. As leaders in the graphic industry, we are confident that all graphics that we produce will leave you looking your best.

## Quickscreen 3 - Premium Elliptical

- Easy graphic cassette replacement cassette
- Telescoping pole
- Lights available
- Nylon carrying case included with every QS3
- Multiple base endcap colors to choose from: Silver (S) - blue (BL), grey (G), green (GR), red (R), chrome (CHR), amber (AMB), Tranparent (TRA)
- Lifetime warranty on all hardware components

Deluxe Podium Case	Prices
12" X 50" Case only	\$212
12" X 38" Case only	\$202
12" X 26" Case only	\$185

# Non Retractable Banner Stands

Non retractable banner stands are ideal for lobbies, retail and some trade show applications. Because they require manual set up and take down, and the graphics are not self-contained, it is more likely that the graphic panels on this type of display will see more wear and tear.

As is the case with retractable banner stands, we have selected only the best hardware to promote in this catalog so that you will look your best and not be left empty handed with broken hardware.

Similar again to retractables, it is important that you purchase high quality graphics to enhance your image. As a recap, high quality graphics (1) are produced using high resolution printing technology so that your graphic accurately represents your image and (2) are curl resistant. As leaders in the graphic industry, we are confident that all graphics that we produce will leave you looking your best.

## Expand Smartstand

- Double sided capability
- Telescopic pole allows for height variability
- Sleek boomerang style chrome base
- Lights available (single or double sided)

# Portable Outdoor Displays

Our outdoor displays pairs durable and attractive hardware with high end graphics that will make you look your best. They are great for use at outdoor events, fairs, promotions and resorts.

We promote a unique type of banner stand that utilizes a swivel system that allows the graphic to sway in the wind. We also promote a flag stand that comes in a wide variety of sizes.

Fabric or vinyl graphics are standard for application to outdoor displays.

## MediaScreen2 Outdoor - Double Sided

39.5" x 150" (w/x base and weight)	\$1100
prices include shear fabric graphic	

# Coming Soon...

# Mag-Panel Pop Up Booth Displays

There is a wide range of pop up booth display hardware on the market. All of it does basically the same thing - creates a fixture onto which is placed rollable graphic panels.

We promote three different pop up hardware types: the Coyote, the Abex and the E2000. The Coyote is a budget friendly display. The Abex is our favorite American Made mid-grade pop-up display. The Swedish E2000 is perhaps the best quality of hardware on the market, both in terms of strength and flexibility.

We have two types of magnetic booth panel graphics: the XP-Value line (laminated vinyl print, mounted to 020 styrene) and the XP-Pro line (hi-res film print w/embossed vinyl over laminate and light blocking backer). The XP-Value line is used on the Coyote displays by default and the XP-Pro line is more by default used on the Abex and E2000 displays.

## 8' Coyote Pop Up Display

### The Basic Coyote Kit Includes:

- Frame and Magnet Bars

Add podium graphic	\$257 ea.
Add fabric frontrunner	\$150

- Stores pop-up booth hardware and graphics and all components of the case
- 6 Year warranty on all hardware components

# Tension Fabric Pop Up Displays

There is a wide range of fabric pop up booth display hardware on the market. All of it does basically the same thing - creates a fixture onto which is placed fabric graphic panels.

Fabric pop ups, which are similar to standard pop ups, have a couple advantages. The fabric graphic panel that attaches to the frame stays on at all times, making it easy to set up and take down. It is also lighter in weight than its rollable graphic sibling. However, while the colors are very bright, fabric does not have as nice of a print resolution as does inkjet printed pop up booths graphics, which is something to weight during decision making.

We promote two different fabric pop up hardware types: the Hopup and the Expand MediaFabric. The Hopup is a budget friendly display. The Media Fabric is perhaps the best quality of hardware on the market, both in terms of strength and flexibility.

## 8' Expand Media Fabric Pop Up

- Includes Curved or Straight Frame and Graphic
- Flat Fabric Endcaps
- Halogen Lights
- Deluxe Podium Case w/ wheels

Eight Foot MediaFabric	Prices
Basic Kit (see above)	\$2357

# Truss System Basics

Truss systems have come a long way in terms of ease of set up, weight and appearance. Whereas it would once take a team of people hours of work to set up even a simple 10' x 10' display, it now takes a team of two people only 30 - 60 minutes! Our favorite feature of the systems promoted here in is that they all feature set up without tools, nuts, bolts or butterfly screws!

Truss systems are made to fit into 4 different types of booth spaces: 10'x10' inline, 20'x10' inline and 20' x 20' island. However, as truss systems are essentially oversized erector sets for adults in the business world, they are flexible, and often a larger configuration can be reconfigured to work in smaller spaces.

The graphics that are attached to the hardware are either magnetic rollable hi-res inkjet prints or light weight fabric. If you haven't ventured into the world of truss systems, we offer an affordable, easy to use option that will not dissapoint you!
